

## Internet Management System

- ✓ Restrict Internet Access
- ✓ Filter Websites and Content
- ✓ Manage & Report Internet Use
- ✓ Enforce Acceptable Use Policies

### Are You Aware of the Importance of Internet Security?

- **30% to 40% of employee Internet use isn't work related.**
- **Malicious computer use and Internet misconduct costs businesses billions every year.**
- **Over 60% of businesses have no internal security policy regarding the use of the Internet.**
- **Anti virus software and firewalls will not protect computer systems from malicious Internet users and employees.**
- **Internet access is enemy number one for software piracy.**
- **A quarter of companies have dismissed employees for Internet misconduct.**

Overall there is a distinct lack of awareness of the importance of Internet security. If your computer systems have only the usual virus protection and/or a firewall then your systems are at risk from internal abuse and misuse.

### Introducing Indigo Scape Internet Management Security Software

Indigo Scape is an Internet Management and Security Software System for Microsoft Windows® platforms. Indigo Scape features sophisticated Internet Filtering, Content Control, Acceptable Use Policies and Reporting allowing you to Monitor, Control and Restrict Access to all resources on the Internet.

Our Internet Management Security Software has been developed to address the difficult and sometimes delicate issue of allowing Internet access to employees within a business. Our software protects and secures business systems by restricting access and enforcing acceptable use policies as a network based Internet security management system.

- **Safeguards your business and protects your interests.**
- **Huge cost and time savings in both the long and short term.**
- **Protects against malicious Internet users and/or employees.**
- **System stabilization and reduced maintenance costs.**

Indigo Scape lets you restrict access to all Internet resources providing unique security coverage for business and network users. Investment in our security software is guaranteed to reduce costs, safeguard your computer systems and actively protect your business.

### Key Features and Benefits:-

- ✓ **Restrict Internet Access**
- ✓ **Filter Websites and Content**
- ✓ **Manage & Report Internet Use**
- ✓ **Enforce Acceptable Use Policies**

Our software is designed to maximize business efficiency and increase profits through increased user productivity, reduced support overhead and elimination of legal costs for employee tribunals.

The Indigo product line offers businesses a choice and range of features designed to fit within your business requirements and budget.
